

MUSIC SCHOOL MONTHLY REPORT

July, 1950

July was a rather unsettled month due to many requests from students for a week or two of vacation time. Also cancellations, temporary and permanent, added to vacations, will serve to diminish our income for the month considerably.

Data on enrollment figures is given on attached sheet.

Concerning curriculum, the students are enjoying the change and variety that the summer courses are offering them. These courses were designed to give students a unit of study that would be complete in itself within the eight-weeks term and apart from the regular theory course that will be resumed when the fall term begins. This is to avoid the difficulty of having students, who were out for the summer, catch up work missed during the eight-weeks term.

There was more opportunity during this month for the director to confer with parents and others. It is hoped that there will be time for continued conferences with all parents concerning their children's progress. For number of conferences please see monthly attendance report.

Respectfully submitted,

---

Dorothy Chun, Director
