Quote from article by Walter F. Dillingham in Paradise of the Pacific
April 1940:

"A vice president of Rockefeller Foundation said: 'I wish to congratulate the city and county of Honolulu in having in the Palama Settlement one of the best conceived and run social health centers that I have seen anywhere. One is impressed with the combination of scientific spirit, team play and human interest shown in the institute. I feel that the money spent for its maintenance and development is well justified and the community may well be proud of the institute's achievements.' "

ask WFD who said it?
